The Beauty Revolution

KEY Elements Catalog
Peptine Age ABC®

Description:
Complete and effective triple action anti-aging line. It is combination of exclusive Peptine® nutrients and a powerful antioxidant complex. It has nutrients that are essential in anti-aging treatments (aging as a result of protein demolition and high organ-specificity). These nutrients act in the cutaneous and circulatory cells integrating themselves to its metabolism, favoring the anti-toxic function and adding genuine material for their repair.

A Peptides and polypeptides from skin, placenta, collagen and elastin-like polypeptides: they favor repair and balance of the skin's cellular functions. They boost, revitalize and protect the production of collagen and elastin, ensuring moisture retention which is essential for skin elasticity.

B Irreplaceable amino sequences from the vascular tissue, Asian centella and ginkgo biloba: they help in collagen biosynthesis, in the antioxidant shield and in the restoration and protection of arterial and venous circulation.

C Vitamin C: it inhibits free radicals, regenerates oxidized vitamin E and participates in the collagen, amino acids and carnitine biosynthesis. It counteracts the effects of smoking. Vitamin E: main antioxidant. It prevents fat oxidation and protects other substances sensitive to oxidation (such as vitamin A and C). Zinc: Antioxidant mineral that intervenes in the metabolism of the SOD enzyme and vitamin E. Selenium: it participates in the defense against oxidative stress and it is very important for the action of vitamin E.

Beta-carotene (provitamin A)

Action:
It is an effective assistant in reducing the signs of aging. It prevents the formation of new lines. It gives greater skin firmness and smoothness. It helps reduce superficial damage caused by UV rays and environmental aggressors.

How to use it:
An intake of A+B+C every morning, before breakfast. It is recommended to avoid treatment interruptions for at least 8 weeks. It is totally safe: it can be taken regularly without any risks during long periods of time.

Recommendations:
It is made of natural ingredients. No fat, no sugar, no drugs, no hormones. It does not cause side effects or intolerance. It is not recommended during pregnancy and breastfeeding.

Presentation
Pack: 30 capsules
Ampoules: 10 ampoules of 3 ml each

Peptine Anti-cellulite ABC®

Description:
It is a unique combination of triple action nutricosmetics for a complete and efficient treatment against cellulite. It adds specific cell nutrients together with complementary active principles that are essential for the protection of the vascular tissue, the venous-lymphatic and arterial flux reactivation, the boosting of collagen and elastin, and the strengthening of the antioxidant defense.

A Placental and umbilical cord amino sequences: They help repair skin cellular damage. Asian centella: it protects the vascular tissue, boosts collagen biosynthesis and optimizes cellular functions. Ginkgo biloba: Powerful antioxidant and circulation stimulant. Vitamin C: it stabilizes the immune system, improves circulation and venous return, it cleans the arteries and delays cellular aging. Vitamin B6: it helps balance hormone production and tallow on the skin.

B Pre-assembled amino acids: They help renew collagen, elastin and muscle. They favor restoration and revitalization of the skin tissue.

C Specific peptides and polypeptides: They help balance and activate the immune system; the fundamental pillar to stop cellulite from spreading.

D Asian centella:
It protects the vascular tissue, boosts collagen biosynthesis and optimizes cellular functions. Ginkgo biloba:
Powerful antioxidant and circulation stimulant. Vitamin C:
It stabilizes the immune system, improves circulation and venous return, it cleans the arteries and delays cellular aging. Vitamin B6:
It helps balance hormone production and tallow on the skin.

Action:
It is an exclusive cellular contribution. It participates in the restoration and defense of the full development of adipose lobules, helping correct and prevent disorders such as cellulite.

How to use it:
An intake of A+B+C every morning, before breakfast. It is recommended to avoid treatment interruptions for at least 8 weeks. It is totally safe: it can be taken regularly without any risks during long periods of time.

Recommendations:
It is made of natural ingredients. No fat, no sugar, no drugs, no hormones. It does not cause side effects or intolerance. It is not recommended during pregnancy and breastfeeding.

Peptine Homeostatic M/F®

Description:
It is a selection of Peptine® specific cell nutrients that helps protect skin characteristics, face stress, protect the stability of the nervous system, prevent glandular deficiencies and maintain treatment success. It is strengthened with powerful antioxidants: vitamin A, vitamin E, vitamin C, zinc y selenium.

A Specific cell nutrients for men: They regulate and normalize the neuroendocrine functions, which are closely related to the stability of emotions, intellectual processes and skin elasticity. They counteract the effects of unbalanced male hormone secretion, which is worsened by daily stress: irritability, depression, and somnolence, loss of sexual interest, tiredness and damage of the cutaneous tissue.

B Specific cell nutrients for women: They repair the tissues of the female endocrine and nervous systems that produce a fresher and younger skin. They stabilize the natural hormone self-production, complement for all kinds of treatments (especially those of Key Elements®).

C Vitamin A: it participates in cell division and growth. Vitamin E: it is essential for fertility and endocrine balance. Vitamin C: it influences mood and participates in the right production of sexual hormones. Zinc: it participates in the glandular processes and in the immune system. Selenium: it helps maintain the immune system.

Action:
It is an effective natural assistant in the regulation of organic functions. It favors the balance of the whole male and female neuroendocrine axis, cooperating with cutaneous health and its rejuvenation.

How to use it:
A daily intake before breakfast. It is recommended to avoid treatment interruptions for at least 8 weeks. Peptine Homeostatic M and F® are an excellent complement for all kinds of treatments (especially those of Key Elements®).

Recommendations:
100% natural product. No fat, no sugar, no drugs, no hormones. It is not recommended during pregnancy and breastfeeding. Ideal for people exposed to a great psycho-physical fatigue: athletes, executives, professionals and the elderly.

Presentation
Pack: 30 capsules

Vitamin A:
It participates in cell division and growth. Vitamin E:
It is essential for fertility and endocrine balance. Vitamin C:
It influences mood and participates in the right production of sexual hormones. Zinc:
It participates in the glandular processes and in the immune system. Selenium:
It helps maintain the immune system.
**Peptine Bioactive®**

**Description:**
Highest quality and purity 100% oligonucleotides cell nutrient (nucleotides and polynucleotides). It allows for cell's healthy proliferation, growth and life, boosting repair processes and tissue regeneration. In a cell medium that is deficient in raw material, the duplication process is either delayed or canceled, causing a shortage in protein synthesis and altering the normal functions of cell's self-regulation, regeneration and chemical balance. Clear and light, Peptine Bioactive® helps counteract this shortage recovering cell vitality, reproductive capacity and protein concentration with multiple main functions: Protecting skin beauty and assisting in the body's revitalization, regeneration, energy and natural defense.

**Organ-specific protein-derived:** They boost cutaneous regeneration and repair.

**Action:**
Restores skin imperfections. Accelerates skin repair and is involved in even the most lines fine, promoting straightening. This renovation provides skin softness, lightness, elasticity and turgidity. Reinvigorates and restores physical and mental exhaustion. Reconstituted and energizes the body functions Handicapped Reactivate the body's natural defenses, improving the general welfare. Assists in the prevention of organ dysfunction and premature aging.

The action represents Peptine Bioactive® an excellent complement to all kinds of treatment, especially developed for the Key Elements® line. Homeostatic Peptine®, Peptine Age® and Peptine Anti-cellulite®.

**How to use it:**
An intake before breakfast, once a week or every other day. It is recommended to avoid treatment interruptions for at least 8 weeks. It is totally safe: It can be taken regularly without any risks during long periods of time.

**Recommendations:**
100% natural product. No fat, no sugar, no drugs, no hormones. It does not cause side effects, addiction or intolerance. Ideal for people exposed to a great psycho-physical fatigue. Athletes, executives, professionals, the elderly and all those who want to improve their quality of life. It is not recommended during pregnancy and breastfeeding.

**Peptine Hair®**

**Description:**
It is a hair bio-regenerator. It has specific cell nutrients that regenerate and revitalize the mechanisms involved in hair growth and quality. It restores and protects the metabolism of each of the cells of aged, dry or irritated skin, even the ones in the scalp. It adds peptides, polypeptides and amino acids from collagen and placenta; bio-estimulating agents of the microcirculation and amino sequences for body detoxification. It is enriched with zinc, grape seeds, taurine, biotin, cysteine, iron, copper, vitamin C, vitamin E, selenium and magnesium.

**Collagen and placental protein-derived:** It restores and revitalizes the cutaneous cell metabolism.

**Zinc:** It is essential for keratin bio-synthesis, hair regeneration processes and hair growth. It is antiseborrheic.

**Grape seeds:** They strengthen hair flexibility and integrity. Their bioflavonoids maintain collagen and elastin undamaged. It delays the effects of aging.

**Taurine:** It protects the hair bulb from the processes of deformation and compression.

**Biotin:** It participates in the regulation of seborrhea. Its shortage can cause hair breakage, loss and alopecia.

**Cystine:** It is a great percentage of the hair. It acts in the keratin bio-synthesis. It helps in the mechanical resistance, density and diameter of the hair shaft and in the proliferation of cells in the hair follicle.

**Iron:** It is necessary for the oxygenation of the follicular root. It prevents hair weakening and later damage.

**Copper:** It helps hair pigmentation, texture and softness. It prevents hair loss and refinement.

**Vitamins C and E:** Antioxidants. They block free radicals which damage nutrients that are essential for hair softness. They help good blood circulation of the scalp for an ideal hair mass growth. Vitamin C activates collagen synthesis and helps absorb iron. Vitamin E helps recover brilliance and it is essential for cases of baldness.

**Selenium:** Antioxidant. It protects hair fiber elasticity. It prevents hair breakage. It fights dandruffs.

**Magnesium:** It gives volume and body to hair mass. It is effective for weak hair and premature baldness.

**How to use it:**
An intake of 2 capsules every morning, before breakfast. It is recommended to avoid treatment interruptions for at least 8 weeks. It is totally safe: It can be taken regularly without any risks during long periods of time.

**Recommendations:**
100% natural product. No fat, no sugar, no drugs, no hormones. It does not cause side effects, addiction or intolerance. Ideal for people exposed to a great psycho-physical fatigue. Athletes, executives, professionals, the elderly and all those who want to improve their quality of life. It is not recommended during pregnancy and breastfeeding.
**Peptine Age Cream®**

**Presentation**
- Emulsion 100 grams
- Cream 60 grams

**Description:**
Emulsion specific cellular nutrition to prevent and reduce wrinkles. In line with the most effective active ingredients proven aesthetic treatments, uniquely combines higher concentrations of specific nutrients and essential: placenta-derived protein, skin, collagen and elastin, which assist in restoration and revitalization of tissue skin; vitamin A, vitamin E, vitamin C, hyaluronic acid, allantoin, urea, ceramides.

**Protein derived from placenta, skin, collagen and elastin:** assist in the restoration of the skin tissue.

**Vitamin A:** prevents the formation of wrinkles. Counter the harmful effects of the sun.

**Vitamin E:** Powerful antioxidant and firming. Acts as reinforcement of the cell layers.

**Vitamin C:** Restores radiance, improves elasticity, refines texture, fades skin blemishes and uniform tone.

**Hyaluronic acid:** Moisturizing and regenerative action. Restores elasticity. Protects from external aggressions.

**Allantoin:** Power cell regeneration. Soothes roughness.

**Ceramides:** Increases hydration. Accelerates repair of skin damage.

**Urea:** Facilitates hydration of the dermis.

**Action**
Effective assistant in reducing signs of aging. Prevents formation of new lines. Provides greater firmness and softness to the skin. Helps reduce the surface damage by UV rays and environmental aggressors.

**Instructions for use**
Apply every evening on the skin of the face and neck, massaging gently until completely absorbed. Treatment is recommended uninterrupted for at least 8 weeks.

**Recommendations**
100% natural, fragrance or colorants. Hypoallergenic.

---

**Peptine Anti-cellulite Cream®**

**Presentation**
- Emulsion 100 grams

**Description:**
It is a specific cell nutrition anti-cellulite emulsion that acts directly in the skin’s deep structures where the cellulite process takes place. It has a dermo-nutritive complex with placental, skin, collagen and elastin protein-derived that improves the skin’s quality and structure and increases its capacity to prevent cutaneous damage. It is enriched with Asian centella, caffeine, seaweeds, hamamelis, Indian chestnut, vitamin A and vitamin E.

**Placental, skin, collagen and elastin protein-derived:** They improve cutaneous quality and structure.

**Asian centella:** It tightens the structure holding skin elastin and collagen.

**Caffeine:** It activates lipolysis and mobilizes accumulated fat.

**Seaweeds:** They help reduce orange peel appearance.

**Hamamelis:** It helps strengthen vein circulation. It has an anti-inflammatory effect.

**Indian chestnut:** It boosts regular muscle tone in the venous wall. It is an anti-inflammatory. It helps reducing edema.

**Vitamin A:** It prevents wrinkle formation. It counteracts the effects of sun.

**Vitamin E:** Powerful antioxidant that protects cell structures.

**Action**
It helps remove toxins and improve skin superficial circulation, which reduces tissue inflammation and relieves the sensation of leg heaviness.

**How to use it:**
Apply it once or twice a day on the skin to be treated, massaging gently until it is fully absorbed. It is recommended to avoid treatment interruptions for at least 8 weeks.

**Recommendations:**
100% natural product. No perfume, no colorant. It is hypoallergenic.

---

**Exfoliant**

**Presentation**
- Emulsion 100 grams
- Cream x 60 grams

**Description:**
It is a natural exfoliant emulsion for all kinds of skin. It has quartz crystals, allantoin, camomile and lactic acid.

**Quartz crystals:** Micro-exfoliants. They deeply clean the skin. They remove dead cells. They help blood microcirculation activation.

**Allantoin:** It boosts cell’s regeneration. It softens roughness.

**Camomile:** It eliminates inflammations and boosts epidermal regeneration.

**Lactic acid:** Component of the hydrolipidic film. It opens the tallow excretion conduits that are blocked. It can accelerate the introduction of other active principles in the follicle.

**Natural moisturizing factor:** It favors water fixation on the dermis superficial layer.

**Action**
Its mineral microspheres soften the skin’s surface without irritation, removing impurities and dead cells. It activates microcirculation. It boosts cellular renovation. It prevents spots and premature wrinkles. It recovers skin’s brilliance and vitality.

**How to use it:**
Apply it on the skin to be treated, massaging softly. Rinse with plenty of water.

**Recommendations:**
100% natural product. No perfume, no colorant. It is hypoallergenic.
**Peptine Hydro Skin®**

**Presentation:**
- Emulsion 100 grams
- Cream 60 grams

**Description:**
It is a specific cell nutrition moisturizing, hydrating emulsion that gives the skin a perfect texture. It is a non-abrasive treatment with placental, skin, collagen and elastin organ-specific nutrients. It is enriched with hyaluronic acid, keratin, urea and aloe vera.

**Action:**
It has placental, skin, collagen and elastin organ-specific nutrients.
- **Hyaluronic acid:** A natural component that absorbs water and increases the skin's volume.
- **Keratin and urea:** They help restore the natural moisture of the cutaneous tissue.
- **Aloe vera:** It has moisturizing and softening properties. It regenerates cells and prevents premature aging.

**How to use it:**
Apply it every morning on the skin to be treated, massaging gently until it is fully absorbed. It can be applied as many times as required.

**Recommendations:**
100% natural product. No perfume, no colorant. Hypoallergenic.

---

**Peptine Nutra-Dry Skin®**

**Presentation:**
- Emulsion 100 grams
- Cream 60 grams

**Description:**
It is a specific cell nutrition emulsion for dry skin. It has placental, skin, collagen and elastin protein-derived. Enriched with ceramides, panthenol, jojoba oil, musk rose oil and silicone oil.

**Action:**
- **Placental, skin, collagen and elastin protein-derived:** They help restore the cutaneous tissue.
- **Ceramides:** They increase moisture and accelerate cutaneous damage repair.
- **Panthenol:** It increases skin moisture, smoothness and elasticity. It helps in cell metabolism and use of other vitamins. It improves stress resistance.
- **Jojoba oil:** Moisturizing. It helps regulate internal/external water flow and vice versa. It helps prevent wrinkles and obtain a young and smooth skin.
- **Musk rose oil:** It helps dermis regeneration and nutrition, reducing lines of expression. It assists in spot removal, photo aging preventive/corrective actions and cutaneous problems caused by sun exposure.
- **Silicone oil:** It gives moisture and brilliance.

**How to use it:**
Apply it every morning on the skin to be treated, massaging gently until it is fully absorbed. It can be applied as many times as required.

**Recommendations:**
100% natural product. No perfume, no colorant. It is hypoallergenic and ideal for dry, lifeless skin affected by premature aging.

---

**Peptine Nutra-Oil Skin®**

**Presentation:**
- Emulsion 100 grams
- Cream 60 grams

**Description:**
It is a specific cell nutrition moisturizing, hydrating emulsion that gives the skin a perfect texture. It is a non-abrasive treatment with placental, skin, collagen and elastin organ-specific nutrients. It is enriched with hyaluronic acid, keratin, urea and aloe vera.

**Action:**
- **Placental, skin, collagen and elastin protein-derived:** They restore the balance of the skin cell metabolism.
- **Sulfur:** Drying action. It prevents oily residues.
- **Ceramides:** They increase skin moisture. They accelerate cutaneous damage repair.
- **Allantoin:** It boosts cell's regeneration and softens roughness.

**How to use it:**
Apply it every morning on the skin to be treated, massaging gently until it is fully absorbed. It can be applied as many times as required.

**Recommendations:**
100% natural product. No perfume, no colorant. It is hypoallergenic.
Linfar, specializing in Biological Nutrition Laboratory, investigates and works with bioactive nutrients since 1976 with a high level of rigor. Their progress and achievements have enabled the recognition of the scientific community, today concerning being consolidated in Nutrition and Revitalization Diversity in Latin America.

Their contributions are aligned with biological research and technological edge, having achieved development of organ-specific cell nutrients that allow solve problems at the cellular level, restoring and reactivating deficit bodily functions.

Result of its ongoing commitment to health are also important links established with leading research centers and study area medicine internationally. He further submits Argentina Foundation for Research Development Biological-FUNDABIO-dedicated to research, training and teaching of therapies based on organic nutrients.

From its headquarters in Cordoba, Argentina, Laboratory Linfar distributes and exports its products to several lines countries, in a context of constant expansion.

Peptonum Linfar®: Exclusive working with peptones organ-specific action for cell repair organism. Indicated as an adjunct to any as the sole treatment or supplementation in most chronic diseases, as long as medical advice.

Key Elements®: an exclusive line of supplements biocellular, creams and emulsions for skin care. Formulated Peptine®, which favors the restoration structure of the skin from the heart of the cell itself.

Vitalil: nbiologically active nutrients specially developed to meet the daily demands organism. With products for the balance diary of the whole family, people with high wear physical and / or mental, and high-performance athletes.
